COMPANY PROFILE

公司介绍

深圳九鹏科技有限公司是一家多年专业研发、设计、生产销售、安装和售后服务于一体的货架生产厂家;工厂拥有多条自动化货架专业滚轧生产线、自动化喷涂流水线、半自动焊接设备等;凭借多年的生产经验,公司产品销往全国各地,并长期远销国外;公司主要产品有各类仓储货架、展示定制架、整店货架齐购等,亦可为客户量身定做各类仓储或者其他相关产品。

公司秉承“质量第一、客户为尊”的经营理念,不断创新研发,快速适应客户新的需求,欢迎各界朋友莅临参观、指导和业务洽谈。我们坚信只有优质的产品,诚信服务,才会得到客户的信赖;你的信任,我们的责任,我们一直在努力。

Shenzhen Jiupeng Technology Co., Ltd. is a shelf manufacturer that specializes in research and development, design, production, sales, installation, and after-sales service for many years; the factory has multiple automated shelves professional rolling production lines, automated spraying flow lines, semi-automatic welding equipment, etc. Many years of production experience, the company's products are sold to all parts of the country, and they have been exported abroad for a long time; the company's main products include various storage shelves, display custom shelves, and entire store shelves. Related Products.

PRODUCTION EQUIPMENT

生产设备

The factory covers an area of up to 10000 square meters and is equipped with multiple heavy-duty rail machines, automatic powder spraying machines, automatic welding machines, wood cutting machines

Advanced equipment such as large-scale CNC cutting, CNC bending, laser cutting, CNC 3D drilling machines, automated shelf production lines, shot blasting coating production lines, semi-automatic welding equipment, etc

Adopting automated, planned, and scientific operational management methods to ensure high production capacity advantages and industry status

Quality requirements for shelves

Quality: Creating mid to high end quality shelves

1) Material: Thickened Q235B

Square tube	Size / mm	20x20	25x25	25x50	30x60
	Thickn ess / mm	0.8	1.0+	1.2+	1.2+
Choose the appropriate thickness based on the required load-bearing capacity					

- ① Mature production process: full welding, smooth polishing without burrs, and a flat and smooth surface.
- ② Spraying: powder electrostatic spraying process principle: degreasing → rust removal → cleaning → phosphating (or purification), etc

The spraying effect is superior to the spraying process in terms of mechanical strength, adhesion, corrosion resistance, aging resistance, etc; Achieve uniform, smooth and bright spraying, full color, and long-lasting maintenance

3) Packaging and transportation

- ① According to the different transportation distances and the anti shake ability of the product, corresponding packaging requirements are made.
- ② Quality requirements for bulk packaging: adding corner protectors, filling the box with a large amount of pearl cotton, or reinforcing it with wooden frames to minimize product damage during transportation

free design

*Food/lifestyle/promotional/electrical/industrial/electronic display racks can be customized

* Welcome to design with pictures and samples, show off your shelves with you! Design concept:

- ① Customer's philosophy
- ② Usage scenarios
- ③ Product Category
- ④ Load bearing requirements
- ⑤ Display and Placement

To design and showcase the brand image and corporate culture, and to highlight the beauty of the product through the overall design of the product display, making the product display attractive.

1.Side panel: double-sided iron plate bent Welding Forming

2.Advertising lightbox:Promoting product information to stimulate consumers' interest and desire to purchase

3.Advertising Screen:
Conveying Product Information
Screen material selection: Andy board, KT board
Crushing board, extruded board, acrylic, adhesive backing UV printing, silk screen printing

4.Layer board: using bending technology, back Strengthen the surface with reinforcing ribs to make It is subjected to stronger force

5. Storage cabinet: used to store goods

1. Fully and reasonably utilize the unique space

2. Completed the practical function of displaying goods

3. Structural stability, safety and stability

4. The display of goods is abundant in quantity and artistic, which can easily stimulate consumers' desire to purchase.

5. Novel appearance and strong attractiveness

6. Promote product information and present the brand image and corporate culture

Service Process

Design-production-packaging
transportation one-stop service

Customized service process

Determine the style

A. Design based on customer provided
drawings and samples

B. Design styles by our company
based on customer requirements

(including the material and thickness requirements for
the shelves, as well as the material of the image)

2 Sample production

For customers to confirm and inspect samples

3 Mass production

After the customer confirms the sample, arrange for
the production of shelves according to the quantity

4 Packaging and transportation

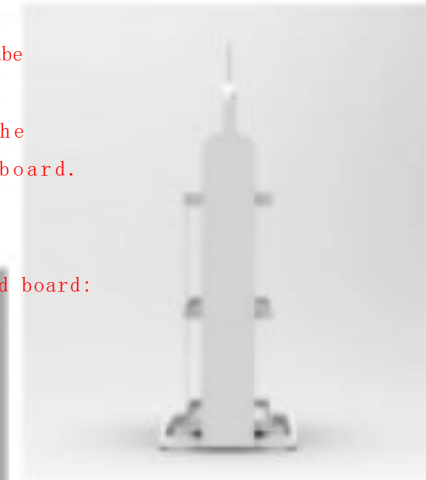

Packaging method: Minimize the damage rate of
products during transportation to the greatest
extent possible

Sketch Map-Diagram

explain:

1. Due to the use of adjustable layers, the square tube stand adopts a 20 * 40 specification
2. The material used for both sides and the head card screen is 5mm white Chevrolet board.
3. The laminated board is made of 0.6mm iron plate, separated by 3mm iron wire inside
4. Material of the front screen of the laminated board:
Made of 5mm white Andy board
5. Equipped with 5 hooks
